Art Unit: 1638

DETAILED ACTION

1. Claims 1-20 are pending.

2. Applicant's election without traverse of Group III, claims 10-13 and 19, including amino acids 1-138 of SEQ ID NO:4 in the reply filed on 12/3/2008 is acknowledged.

Claims 1-9, 14-18 and 20 are withdrawn from consideration for being drawn to nonelected inventions.

3. Claims 10-13 and 19 including a polynucleotide encoding the sequence of amino acids 1-138 of SEQ ID NO:4 are examined in the present office action.

Specification

4. Objection is made to the specification for not incorporating SEQ ID NO's when referring to nucleic acid or amino acid sequences. 37 CFR 1.821(d) requires the use of the assigned sequence identifier (e.g. SEQ I.D. NO: X) in all instances where the description or claims of a patent application discuss sequences.

Sequence identifiers are missing from page 22, line 22, page 23, line 2 and Figure 3 presents six amino acid sequences that are not identified by sequence identifier within the figure or the Brief Description of the Drawings.

Full compliance with the sequence rules is required in response to this Office action. A complete response to this Office action must include both compliance with the sequence rules and a response to the issues set forth herein. Failure to fully comply with both of these requirements in the time period set forth in this Office action will be held to be non-responsive.

Art Unit: 1638

The disclosure is objected to because it contains an embedded hyperlink and/or other form of browser-executable code. Applicant is required to delete the embedded hyperlink and/or other form of browser-executable code. See for example page 32, line 11 and page 39, line 21. See MPEP § 608.01.

Claim Objection

5. Claim 11, line 3, is objected to for omitting the recitation --a-- before the recitation "wild-type".

Claim 13 is objected to for being dependent on claim 11 instead of claim 12.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

6. Claims 10-13 and 19 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. The rejection includes dependent claims.

Claim 10 is indefinite for reciting "floral shoot internodes" without including any adjective to describe how "floral shoot internodes" has been changed because of the insertion of said polynucleotide.

Claim Rejections - 35 USC § 101

35 U.S.C. 101 reads as follows:

Art Unit: 1638

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

7. Claim 13 is rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter.

Claim 13 is drawn to a seed of the transformed plant. Due to Mendelian inheritance of genes, a single gene introduced into a parent plant would only be transferred at most to half the male gametes and half the female gametes. This translates into only three quarters of the progeny having at least a single copy of the transgene and one quarter of the progeny would not carry a copy of the transgene. Given that there is no indication that there would be any other distinguishable characteristics of the claimed progeny (seeds), it is unclear whether the claimed seeds would be distinguishable from seeds that would occur in nature. See *Diamond v*. *Chakrabarty*, 447 U.S. 303 (1980), *Funk Bros. Seed Co. v. Kalo Inoculant Co.*, 333 U.S. 127, 76 USPQ 280 (1948), and *In re Bergy*, *Coats, and Malik* 195 USPQ 344, (CCPA) 1977. The amendment of the claims to recite that the seeds comprise the construct that was introduced into the parent would overcome the rejection.

- 8. Claims 10-13 and 19 are deemed free of the prior art, given the failure of the prior art to teach or reasonably suggest a method for producing a dwarf plant comprising inserting a polynucleotide encoding the sequence of amino acids 1-138 of SEQ ID NO:4 into an expression vector and introducing the expression vector into a plant.
- 9. No claims are allowed.

Art Unit: 1638

10. Any inquiry concerning this communication or earlier communications from the

examiner should be directed to Stuart F. Baum whose telephone number is 571-272-0792. The

examiner can normally be reached on M-F 8:30-5:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's

supervisor, Anne Marie Grunberg can be reached at 571-272-0975. The fax phone number for

the organization where this application or proceeding is assigned is 571-273-8300.

Any inquiry of a general nature or relating to the status of this application or proceeding

should be directed to the receptionist whose telephone number is 571-272-1600.

Information regarding the status of an application may be obtained from the Patent

Application Information Retrieval (PAIR) system. Status information for published applications

may be obtained from either Private PAIR or Public PAIR. Status information for unpublished

applications is available through Private PAIR only. For more information about the PAIR

system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR

system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
